Add point to timeline

Drag the source
to the timeline

The screenshot displays a video editing interface. At the top right, a 'Sources' panel lists three items: 'Introduction of the presentation builder' (blue bar), 'presentation_builder_interface.pdf' (green bar, circled with a white '+' icon), and 'Clear viewport' (dark purple bar). Below these is a text input field containing the URL 'https://www.youtube.com/watch?v=ebJeW6CK--U'. The main timeline at the bottom features a blue track with a white 'X' and '0:00' label, and a green track with a white 'X' and a '1' label. A white arrow points from the circled '+' icon in the Sources panel to a '+' button on the green track in the timeline. A separate '+' button is also visible in the bottom left corner.

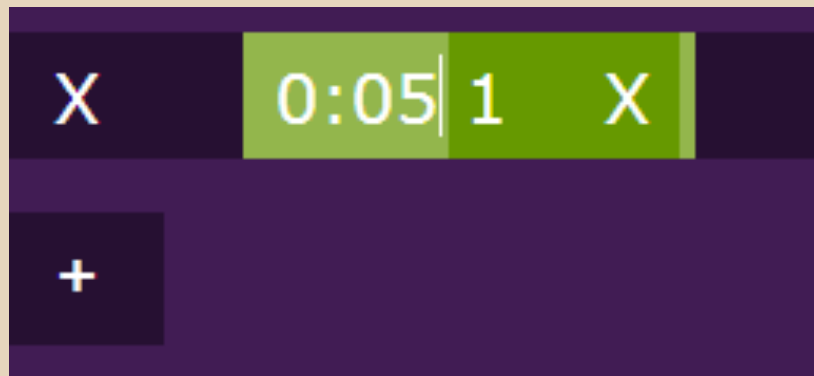

Edit a timeline point

Adjust the slide no. or video position.
Click the white bar to adjust offset.
Click “X” to delete the point.

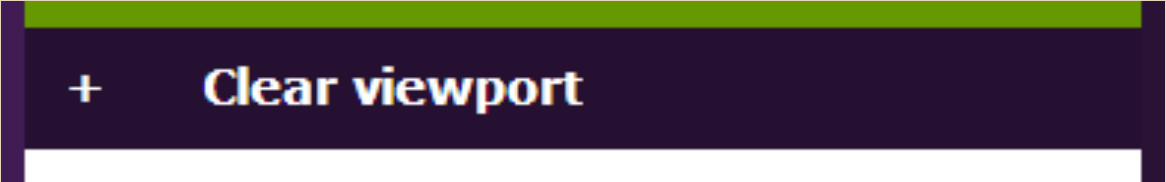

Timeline point example

5 seconds into presentation
display slide number 1

Clear viewport

No content is visible in the viewport

+ Clear viewport

Distribute - Simple

- Link based
- Not editable after distribution
- No web server needed
- Link can be shortened

Distribution - Advanced

- File based
- Can be edited after it is distributed
- Requires upload of the file to a web server
- Link is short by nature

Thanks for watching!
